

Screenshot Appendix - Configuring and Securing a Network Infrastructure

Student Name: Sourav Verma

Screenshot: Capture.PNG

A screenshot of a Windows Command Prompt window titled "Administrator: Command Prompt". The window shows the output of the 'ipconfig' command. The output lists network configuration for various adapters: Ethernet adapter Ethernet (Media disconnected), Ethernet adapter VirtualBox Host-Only Network (IPv4: 192.168.56.1), Wireless LAN adapter Local Area Connection* 1 (Media disconnected), Wireless LAN adapter Local Area Connection* 2 (Media disconnected), Wireless LAN adapter Wifi (IPv4: 10.19.0.76), and Ethernet adapter Bluetooth Network Connection (Media disconnected).

```

Screenshot: pc0 ip.PNG

The screenshot shows a configuration window for PC0 with the following details:

- Window Title:** PC0
- Tabs:** Physical, Config, Desktop (selected), Programming, Attributes
- Section:** IP Configuration
- Interface:** FastEthernet0
- IP Configuration:**
 - ☐ DHCP
 - ☒ Static
 - IPv4 Address: 192.168.10.10
 - Subnet Mask: 255.255.255.0
 - Default Gateway: 192.168.10.1
 - DNS Server: 0.0.0.0
- IPv6 Configuration:**
 - ☐ Automatic
 - ☒ Static
 - IPv6 Address: (empty)
 - Link Local Address: FE80::260:70FF:FE7E:D682
 - Default Gateway: (empty)
 - DNS Server: (empty)
- 802.1X:**
 - ☐ Use 802.1X Security
 - Authentication: MD5
 - Username: (empty)
 - Password: (empty)
- Footer:** ☐ Top

Screenshot: pc1 ip.PNG

The screenshot shows a configuration window for a PC named 'PC1'. The window has four tabs: 'Physical', 'Config', 'Desktop', and 'Attributes'. The 'Config' tab is active, and within it, the 'Desktop' sub-tab is selected. The main configuration area is titled 'IP Configuration' and has a close button (X). Below this title, there is a dropdown menu for 'Interface' set to 'FastEthernet0'. The configuration is divided into three sections: 'IP Configuration', 'IPv6 Configuration', and '802.1X'. In the 'IP Configuration' section, the 'Static' radio button is selected, and the fields are filled with: IPv4 Address: 192.168.10.11, Subnet Mask: 255.255.255.0, Default Gateway: 192.168.10.1, and DNS Server: 0.0.0.0. In the 'IPv6 Configuration' section, the 'Static' radio button is selected, and the fields are filled with: IPv6 Address: (empty), Link Local Address: FE80::201:C9FF:FE91:7608, Default Gateway: (empty), and DNS Server: (empty). In the '802.1X' section, the 'Use 802.1X Security' checkbox is unchecked, and the 'Authentication' dropdown is set to 'MD5'. The 'Username' and 'Password' fields are empty. At the bottom left of the window, there is a 'Top' button.

The screenshot shows a Cisco Packet Tracer PC Command Line window for a device named PC0. The window has tabs for Physical, Config, Desktop, Programming, and Attributes, with Desktop selected. The command prompt shows the execution of the command 'ping 192.168.10.1'. The output indicates that the ping was successful, with four replies received from 192.168.10.1, each with 32 bytes of data, a time of 99ms, and a TTL of 255. The ping statistics show that all four packets were sent and received, with 0% loss. The approximate round trip times in milliseconds are: Minimum = 0ms, Maximum = 99ms, and Average = 24ms.

```
